

Please read this document carefully before using this product. The guarantee will be invalidated if the device is damaged by not following instructions detailed in the manual. The company shall not be responsible for any damage or losses however caused, which may be experienced as a result of the installation or use of this product.

ENDA ECCC411 Configurable Current Converter

Thank you for choosing ENDA ECCC411 Configurable Current Converter Devices.

- 4 Digits digital indicator.
- Easy to use front panel keypad.
- 5A/60mV, CT20/30 current transformer/60mV or 1A input (specify at order).
- Programmable scale range between 5A to 9999A.
- Isolated Modbus RTU communication (optional).
- AC, DC, or True RMS measurement feature.
- Triple isolation between input, output and power.
- Keylock feature.
- 0-20mA, 4-20mA, 0-10V or 1-5V output selection.
- CE marked according to European Norms.

RoHS
Compliant

ORDER CODE

Product Basic Code		ECCC411-xV-CT-RSI	Communication (Optional)
ECCC411	Configurable Current Converter		Blank N/A RSI Isolated Modbus Rs485
Supply Voltage			
UV 90-250V AC		Blank 5A or 60mV	
LV	10-30V DC/8-24V AC	CT CT20/30 veya 60mV	X1 1A

CT20/30 current transformer must be ordered separately if required.

INPUTS

Input Type	For ECCC-xV : 5A or 60mV For ECCC-CT-xV : CT20/30 Current transformer or 60mV For ECCC-X1-xV : 1A
Scale	If input type 5A or 60mV ; the scale range is 0A...9999A (<i>cEcr.r</i> parameter determines the scale. ie: if the <i>cEcr.r</i> is 5 , scale range is 0A...5A). If input type 1A ; the scale range is 0A...9999A (<i>cEcr.r</i> parameter determines the scale. ie: if the <i>cEcr.r</i> is 1 , scale range is 0A...1A).
	If input type CT20/30 or 60mV ; If the <i>ItYP = CT20</i> scale range is 0A...300A, if set to <i>CT30</i> scale range is 0A...120A (<i>tur.n</i> parameter determines the scale. ie: scale range will be 0A...300A / 0A...120A if the <i>tur.n</i> parameter is set to 1). If the <i>ItYP = 5HnE</i> scale range is 0A...9999A (<i>cEcr.r</i> parameter determines the scale. ie: scale range will be 0A...5A if the <i>cEcr.r</i> parameter is set to 5).
DC	If input type 5A or 60mV ; the scale range is -999A...999A (<i>cEcr.r</i> parameter determines the scale. ie: if the <i>cEcr.r</i> is 5 , scale range is -5A...5A). If input type 1A ; the scale range is -999A...999A (<i>cEcr.r</i> parameter determines the scale. ie: if the <i>cEcr.r</i> is 1 , scale range is -1A...1A).
	If input type CT20/30 or 60mV ; DC measurement not possible with current transformer. If the <i>ItYP = 5HnE</i> scale range is -999A...999A (<i>cEcr.r</i> parameter determines the scale. ie: scale range will be -5A...5A if the <i>cEcr.r</i> parameter is set to 5).
Sensitivity	0.02 X <i>cEcr.r</i> (ie : if the <i>cEcr.r</i> parameter set to 5 , sensitivity is 0.01A)
Accuracy	AC/RMS DC ±1% (Full scale) (±2% for square waveform). ±1% (Full scale)
Input Range	If input type 60mV : -60mV...60mV (Device will be damaged if 50V and above voltages applied). If input type 1A : -1A...1A (Device will be damaged if 2A and above currents applied). If input type 5A : -5A...5A (Device will be damaged if 10A and above currents applied). If input type CT20/30 : 0...150mA
Input Impedance	40kΩ for 60mV input. 90mΩ for 1A input. 12mΩ for 5A input. 600mΩ for CT20/30 input.
Frequency Range	DC, 10Hz-200Hz (10Hz-70Hz for square waveform).

ELECTRICAL CHARACTERISTICS

Supply Voltage	ECCC411-UV ; 90-250V AC, 50/60Hz. ECCC411-LV ; 10-30V DC / 8-24V AC, 50/60Hz.
Power Consumption	Max. 7VA.
Wiring	2.5mm² screw-terminal connections.
EMC	EN 61326-1: 2013
Safety Requirements	EN 61010-1: 2010 (Pollution degree 2, overvoltage category II)

OUTPUTS

mA	0-20mA DC or 4-20mA DC, ±0,5% (load resistance max. 500Ω).
V	0-10V DC or 1-5V DC, max.10mA, ±0,5% (Short circuit protected).

ENVIRONMENTAL CONDITIONS

Ambient / Storage Temperature	0 ... +50°C/-25 ... 70°C (with no icing).
Max. Relative Humidity	Relative humidity 80% for temperatures up to 31°C decreasing linearly to 50% relative humidity at 40°C.
Rated Pollution Degree	According to EN 60529 ; IP20
Height	Max. 2000m

KEEP AWAY device from exposed to corrosive, volatile and flammable gases or liquids and DO NOT USE the device in similar hazardous locations.

HOUSING

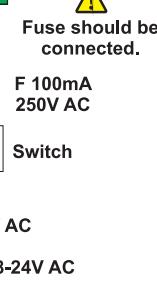

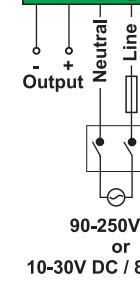

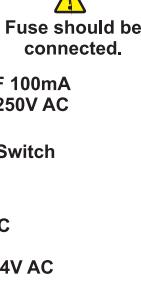

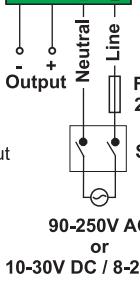

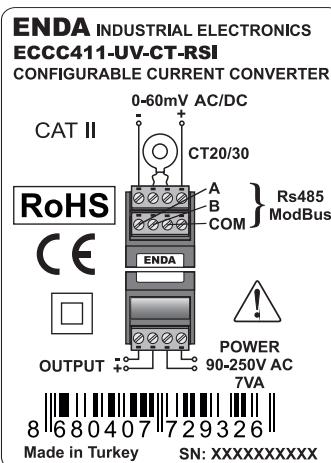

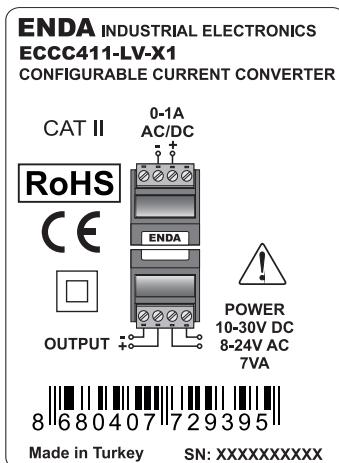

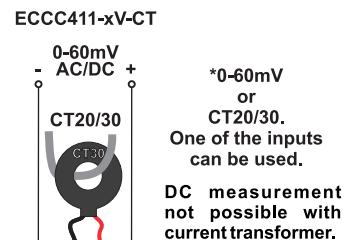

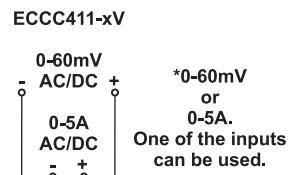

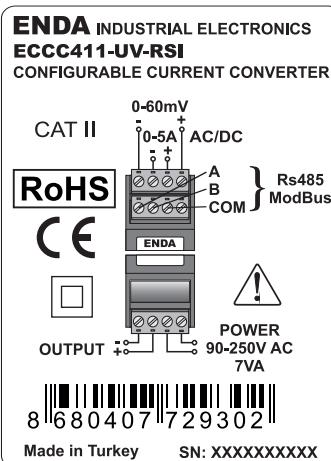

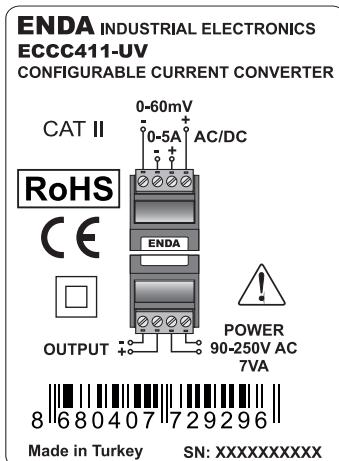

Housing Type	Rail mounted (EN60715, TH35).
Dimensions	W25xH97xD115mm.
Weight	Approx. 150 g (After packaging).
Enclosure Material	Self extinguishing plastics.

Avoid any liquid contact when the device is switched on.
DO NOT clean the device with solvent (thinner, gasoline, acid etc.) and / or abrasive cleaning agents.

CONNECTION DIAGRAM

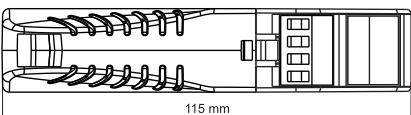

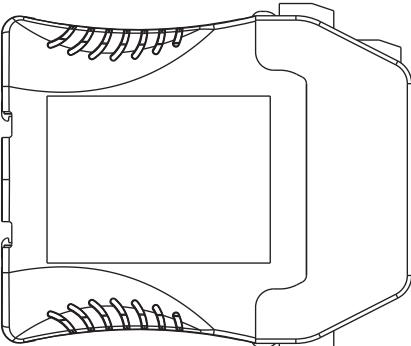

Please see "Modbus Connection Diagram" on page 4.

Equipment is protected throughout by DOUBLE INSULATION
 Holding screw 0.4-0.5Nm.

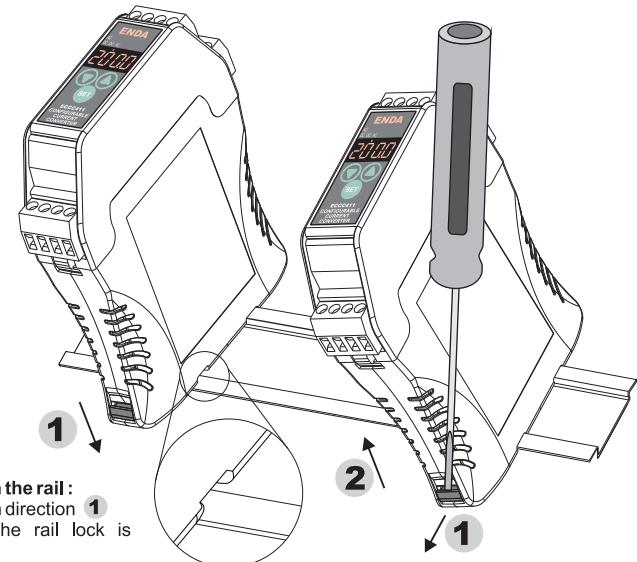

- 1) Mains supply cords shall meet the requirements of IEC 60227 or IEC 60245.
2) In accordance with the safety regulations, the power supply switch shall bring the identification of the relevant instrument and it should be easily accessible by the operator.

ENDA ECCC411 Series converters are rail mounted devices. Make sure that the device is used only for intended purpose. The shielding must be grounded on the instrument side. During an installation, all of the cables that are connected to the device must be free of energy. The device must be protected against inadmissible humidity, vibrations, severe soiling and make sure that the operation temperature is not exceeded. All input and output lines that are not connected to the supply network must be laid out as shielded and twisted cables. These cables should not be close to the power cables or components. The installation and electrical connections must be carried on by a qualified staff and must be according to the relevant locally applicable regulations.

DIMENSIONS

MONTAGE

Mounting the device on the rail :
- Push the device to rail in direction 1 and make sure that the rail lock is interlocked to rail.

Removing the device from rail :
- Push the rail lock in direction 1 with a screwdriver and pull the device in direction 2.

TERMS

AC/DC LED lit if the True RMS input type is selected.
DC LED lit if the DC input type is selected.
AC LED lit if the AC input type is selected.

Program Key Allows to monitoring and setting up the selected parameter in "Programming Mode".

Increment Key Allows navigating to the previous parameter and increase the current parameter value in "Programming Mode". Parameter value will increase rapidly when continuously pressed. Also allows to lock or unlock the keypad in "Running Mode".

Decrement Key Allows navigating to the next parameter and decrease the current parameter value in "Programming Mode". Parameter value will decrease rapidly when continuously pressed. Also allows setting the default value in "Running Mode".

PROGRAMMING MODE

2000

During "Running Mode", by pressing and keys together for 3 seconds "Programming Mode" is entered. While in "Programming Mode", if the and keys are pressed together for 3 seconds or no operation is performed, returns to the "Running Mode".

ctr

Current Conversion Ratio.
Can be set between 5 (1/5) and 9999 (1/5).
(ctr parameter will not be displayed when the input type (IYP) set as CT20 or CT30 in "CT" input devices).

type

Measurement Method.
Can be selected as RC, dC, or RCdC.
The LEDs on the top side of the display indicates the selected measurement method.

dpnt

Decimal Point Selection.
Decimal place changes automatically depended on measurement value. The decimal place can be set as follows:
If less than 10, (0.000), (0.00), (0.0) or (0).
If between 10 and 100, (0.00), (0.0) or (0).
If between 100 and 1000, (0.0) or (0).
If over 1000, (0).

optn

Sampling Time.
One of the sampling time selections can be set as follows in seconds.
 $I = 250\text{ms}$; $2 = 500\text{ms}$; $3 = 750\text{ms}$; $4 = 1\text{ second}$.

rdr5

Device Address.
Can be set between 1 and 247
⚠️ For Modbus featured devices only.

baud

Baud Rate.
Baud rate value can be set as follows.
600, 1200, 2400, 4800, 9600, 19200, 38400, 57600 or 115200.

⚠️ For Modbus featured devices only.

ityp

Input Type (In devices with input type "CT").
Can be set to CT20, CT30, or SHnT. 60mV input is used if SHnT is selected.

tur parameter will not be displayed if the SHnT is selected.

turn

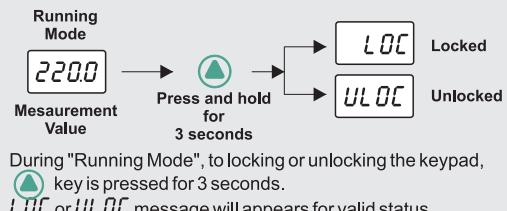

Number of Windings (In devices with input type "CT")
The number of windings (turn) of the current cable getting through the CT20/30 current transformer. Can be set between 1 and 10.

	turn	1	2	3	4	5	6	7	8	9	10
CT20	lin max(A)	300	150	100	75	60	50	42.8	37.5	33.3	30
CT30	lin max(A)	120	60	40	30	24	20	17.1	15	13.3	12

ryp

Analog output selection.
One of the analog output selections can be set as follows.
0-20 mA, 4-20 mA, 0-10 V, 1-5 V.

LOCKING AND UNLOCKING THE KEYPAD

DISPLAYING THE REVISION NUMBER

ERROR MESSAGES

	The current value over than the scale value.
	The current lower over than the scale value.

DEFAULT SETTINGS

Power-up the device by pressing and holding down the key for factory defaults. dPRr message will be displayed if the operation success.

PARAMETER SETTING DIAGRAM

When holding the key, selected parameter flashes and desired value can be adjusted by using increment and decrement navigation keys. If key is pressed or no operation is performed for 3 seconds, the latest change(s) stored, and returned to the parameter.

RC	dC	RCdC (rms)
	$A \frac{1}{\sqrt{2}}$	0.000
	$A \frac{2}{\pi}$	$A \frac{1}{\sqrt{2}}$
	$A \frac{1}{\pi}$	$A \frac{1}{2}$
	A	A
	$A \frac{1}{2}$	$A \frac{1}{\sqrt{2}}$
	$A \sqrt{\frac{d}{T} - \frac{d^2}{T^2}}$	$A \frac{d}{T}$
	$A \frac{1}{\sqrt{3}}$	0.000
